DESIGN /// BUILD /// COMPETE ///

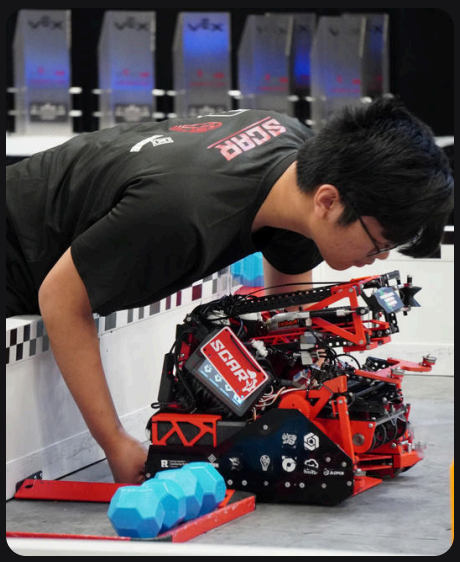

Rutgers University–New Brunswick

WHO WE ARE

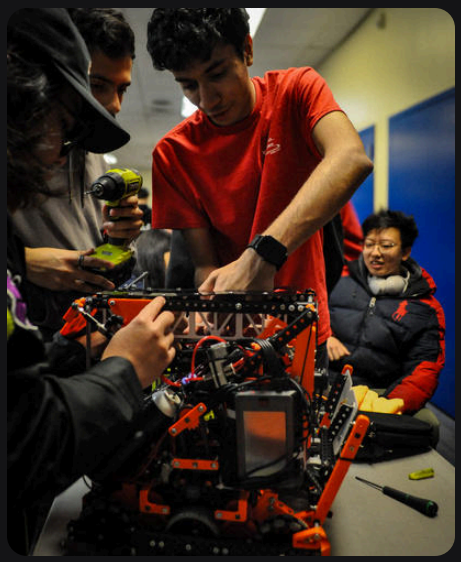

THIS IS SCAR

As the Rutgers University VEXU Robotics Club, we are devoted to inspiring a new generation of technological innovators as they change the world. Rutgers VEXU is open to any student who is passionate about technology, not just engineers. We are a diverse team dedicated to excellence and teamwork, ready to take on the world stage as we represent Rutgers University-New Brunswick. Join us on our journey to take SCAR Robotics to the next level and build an everlasting legacy!

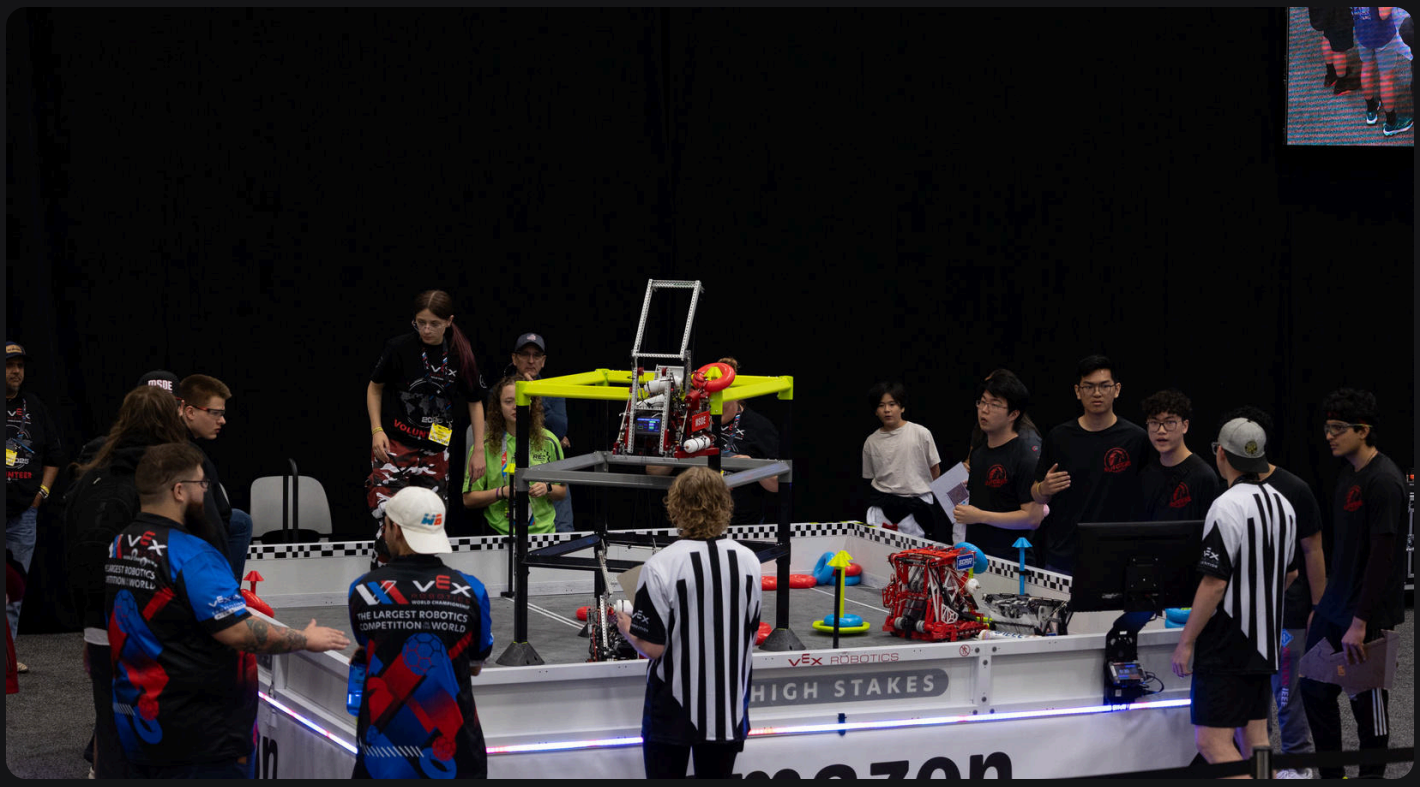

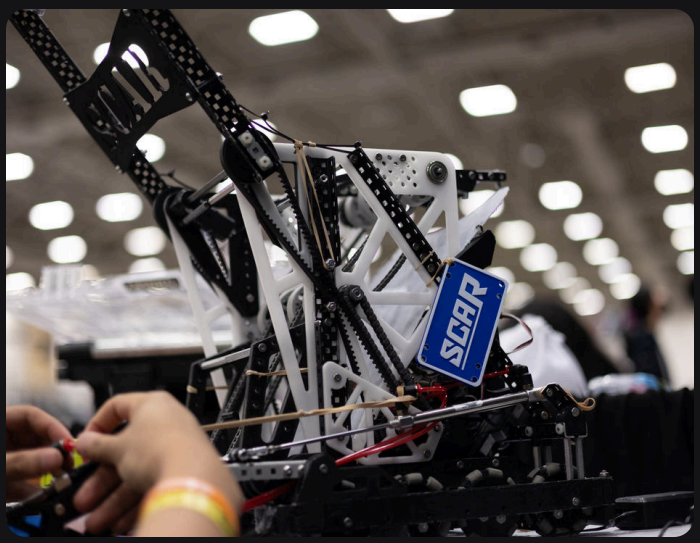

WHAT IS VEXU?

VEXU is a collegiate-level robotics competition designed to pit your university against others in head-to-head matches. Each year, the Robotics Education & Competition Foundation releases a game for which you must design your robot to be the best, whether through intelligent programming, robust build quality, or killer strategy. It is our job at Rutgers VEXU to allow students of all backgrounds and majors to design, build, program, and strategize together to put Rutgers on the map of international competitive robotics.

BUDGET BREAKDOWN

Parts & Equipment	18.3%	**~$3,000**
Travel	68.9%	**~$11,300**
Registration	12.8%	**~$2,100**
Total Expenses		**~$16,400**
